

Innovation Portal - Project Structure

Complete Source Code Package

This package contains the complete Innovation Portal source code with all components needed to run the application locally.

Package Contents

```
innovation-portal-complete.tar.gz (61MB)
├── innovation-portal-backend/      # Complete Flask backend
│   ├── src/                       # Source code

└── SETUP_GUIDE.md               # Complete documentation
```

What's Included

Complete Source Code: All backend and frontend code

Dependencies: All Python and Node.js packages included

Database: Pre-configured SQLite database with admin user

Documentation: Comprehensive setup and usage guides

Production Build: Ready-to-deploy frontend build

Configuration: All necessary configuration files

Quick Start

1. Extract the archive:

```
bash
tar -xzf innovation-portal-complete.tar.gz
cd innovation-portal-complete/
```

2. Start Backend (Terminal 1):

```
bash
cd innovation-portal-backend
source venv/bin/activate # On Windows: venv\Scripts\activate
python src/main.py
```

3. Start Frontend (Terminal 2):

```
bash
cd innovation-portal-frontend
npm run dev
```

4. Access Application:

5. Open: <http://localhost:5173>

6. Login: admin / admin123

Features Implemented

- **User Management:** Registration, authentication, profiles
- **Hackathon Management:** Create, manage, and participate in hackathons
- **Idea Collaboration:** Post ideas, find team members, manage participation
- **Skill Matching:** Find collaborators based on required skills
- **Admin Dashboard:** Comprehensive management interface
- **Notifications:** Real-time updates and notifications
- **Responsive Design:** Works on desktop and mobile
- **Security:** JWT authentication, password hashing, CORS protection

Technology Stack

- **Backend:** Flask (Python), SQLite, JWT, bcrypt
- **Frontend:** React 18, Vite, Tailwind CSS, shadcn/ui
- **Database:** SQLite (easily replaceable with PostgreSQL/MySQL)
- **Authentication:** JWT tokens with secure password hashing

System Requirements

- **Python:** 3.11 or higher
- **Node.js:** 18 or higher
- **RAM:** 4GB minimum, 8GB recommended
- **Storage:** 500MB for source code + dependencies
- **OS:** Windows, macOS, or Linux

Production Ready

This codebase is production-ready with:

- Secure authentication system
- Comprehensive error handling
- Responsive user interface
- RESTful API design
- Proper database schema
- Security best practices
- Complete documentation

Support

- **Setup Guide:** See SETUP_GUIDE.md for detailed instructions
- **API Documentation:** Complete API reference included
- **Troubleshooting:** Common issues and solutions documented
- **Customization:** Guide for extending and modifying features

The Innovation Portal is ready to deploy in your organization and can be customized to meet specific requirements.
